

## Do you like Hedgehogs?

Monday 1st July 2024

[Website](#)

Hello what's this?

Good morning,

For the last couple of months this little Hedgehog has visited our garden every day, "her house" is a large plastic storage box with the recommended 13cm doorway cut into it. This protects her and her food from rain and also the thieving Magpies.

It's about seventy metres to the golf course from where we live, a long way if it's very hot and you only have little legs. She is a creature of habit, her route is well established and she always follows the same track home often returning once or twice more during the night. Did you know that Hedgehogs can travel up to 2 km in the search for food every night.

In the time she has been visiting it has become clear that she hates the rain and can run very fast to escape it. Small slugs like the one in the main image just don't cut it, she prefers the bigger ones with a bit more crunch. There are quite a few Hedgehog shaped holes in the grass where she has dug out something tasty. She loves her special Hedgehog biscuits and fresh water is essential whatever the weather. Never give Hedgehogs bread and milk, they are lactose intolerant and it will make them ill.

### The Monday Picture

One image, ok three this week, and the background story. These photos were all taken with an iPhone 15 pro through double glazing on the 3x zoom or more. Until next Monday have a great week.
